Looking Back at 2012...

- ★ AMRS
- ★ OpenMRS
- ★ HIPPP/OpenHIE
- ★ LOINC
- ★ Evaluation

What to expect in 2013...

Vision & Mission

We envision:

- ★ being a world leader in pragmatic health information solutions
- ★ promotion of a global community where the promise, outcome and real-world value of health information technologies are recognized
- ★ directly contributing to the strengthening of large health care systems
- ★ that the environments we are serving are empowered to implement and maintain this technology on their own

Our mission is to measurably improve the health of the underserved by developing innovative, sustainable health information technology in an open collaborative fashion.
